

# Examining the Impacts of Using 2 BI+ETL Tools In My Organization

Allan Khariton – Sr Data & BI Analyst, Edward Jones

# Current Business Intelligence Landscape

# Analyst Impacts of Existing Setup

## Pros

- Allows for more flexibility based on reporting needs

## Cons

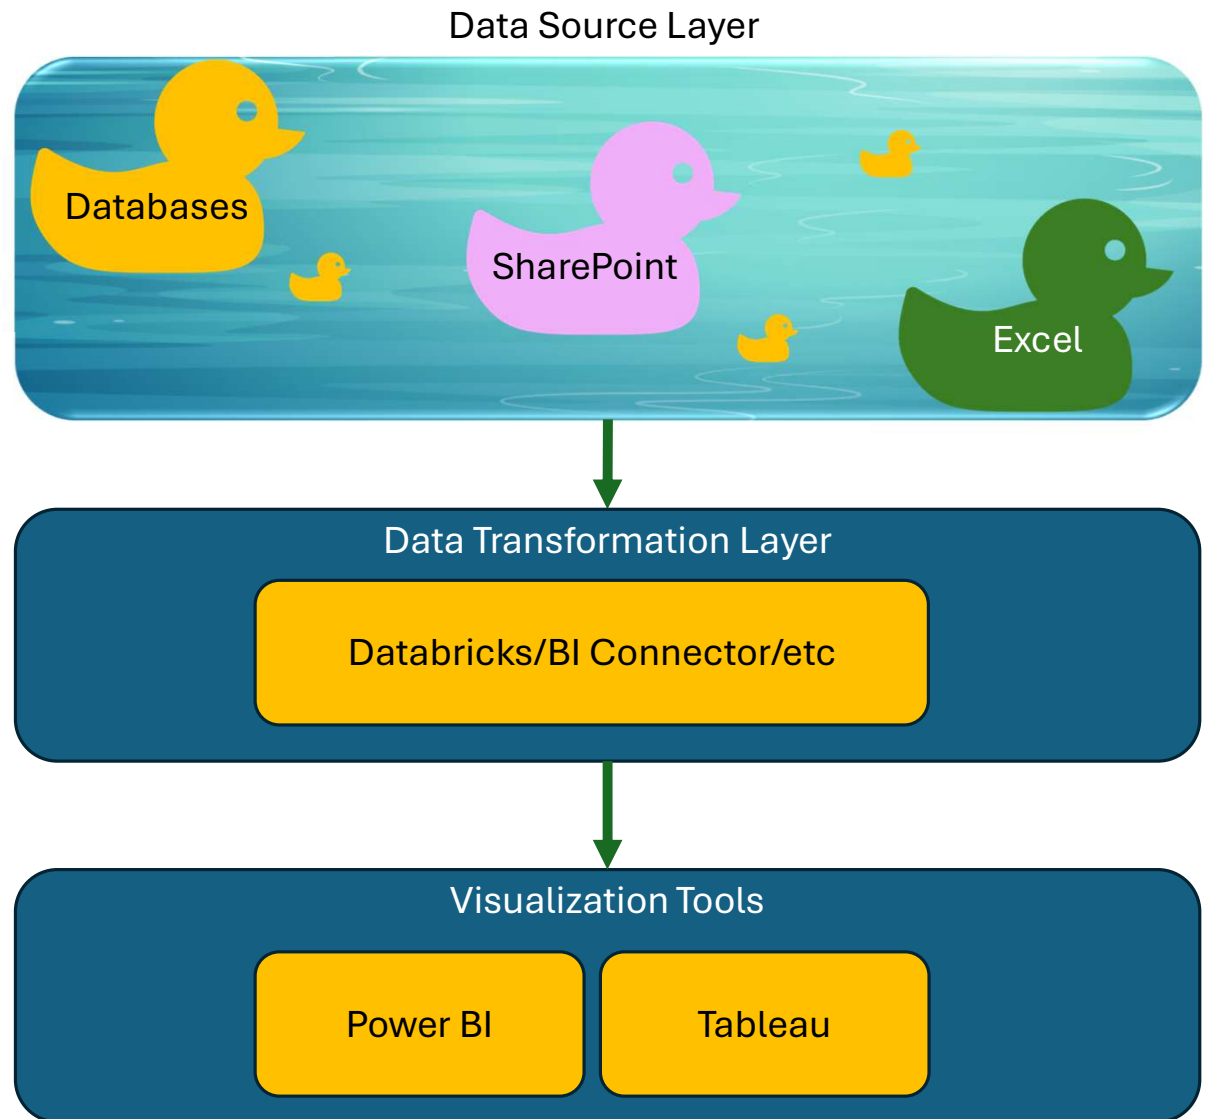

- No centralized area for users/the firm to share processed datasets
- Collaboration among data teams can be challenging
- Teams using both BI tools duplicate efforts
- Data governance becomes more complex to implement

# Current Analyst Solutions

- Duplicate ETL processes
- Export data to Excel
- Tableau URL

# Proposed Solutions Landscape

# Firm Impact of Existing Setup

## Pros

- Utilize best of both tools as needed

## Cons

- Less analyst skill transferability
- More support staff/logistics/licensing required
- More server compute time used
- More time spent maintaining queries
- Data governance becomes more challenging
